What are fibroids?

Noncancerous tissue growths in the uterus

Symptoms

- Heavy menstrual bleeding
- Menstrual periods lasting more than a week
- Pelvic pressure or pain
- Frequent urination
- Difficulty emptying the bladder
- Constipation
- Backache or leg pains

Do you check any of the boxes?

Up to 80% of all women will have fibroids by the age of 50.

Don’t wait.

Talk to your doctor about your symptoms during your appointment.
